Guide for Parents/ Guardians & Participants

Traleecoderdojo.org

Tralee Coder Dojo in short...

*Tralee Coder Dojo:
who are we and
how to join?*

We are a voluntary organisation under the umbrella of the Coder Dojo Foundation movement in Ireland which is orientated around running free, not-for-profit coding clubs and regular sessions for young people.

We run completely free-to-join, fun coding classes at the IT Tralee North Campus on Saturdays from 1 to 3 pm in Autumn and Spring.

Students receive their first belt for attending five classes and from then on they receive belts of numerous other colour levels up to black depending on the skill/project level that they can demonstrate in any of the available coding languages.

REGISTRATION

Each term is 10 weeks in length and starts in the months of September and February.

All participants must be registered two weeks before each term begins

To find out more, check out our website or send us an email to:

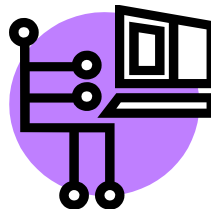

enquiries@traleecoderdojo.org or via our web page www.traleecoderdojo.org.

HOW ARE WE ORGANIZED?

As a volunteer organization our structure is based on the help from:

Parents, who want to give their children better access to the Magic behind the technology that surrounds our everyday life.

Volunteers, who are prepared to give their free time to share their knowledge.

*Learning how to
code is fun!*

And of course from the **Young participants** (our **Ninjas**) who will experience and share a fun social space where other young people come to explore technology together and get advice and support from skilled mentors.

AGE GROUPS

Our participating Ninjas, ages 8 – 17 learn computing and coding skills and we divide them into primary school and secondary school age groups.

The primary school age group (8 – 12 years) must have a parent/guardian present with them during classes, and the older group (13 – 17 years) will have 2 – 3 parents available as supervision during their classes.

There is a participant attendance record which must be signed by each parent/guardian.

PROGRAMS & PROJECTS

Android Developer, Scratch 2.0, Google App Inventor, Lego Robotics, HTML are some of the programs and coding we use, but students in the intermediate groups are free to work on their own projects and ask questions to help complete and improve them.

SUPPORT

Tralee Coder Dojo has been part of the scene in Kerry for quite a few years but this would not have been possible without the support of many people and institutions like Sean Ryan CEO of Aspen Grove Solutions; Dr. Oliver Murphy and the IT Tralee; Kerry County Council and the Castle St branch of AIB.

Also vital to the existence of the Dojo are the donations from parents and individuals. These donations are used to help purchase kits and materials to assist our volunteers / mentors to better prepare our *Ninjas*.

The contributions are non-obligatory but can make a big difference!

Donations can be made at the door or preferably by bank transfer, using the bank details below:

BIC: AIBKIE2D
IBAN: IE71AIBK93621997369088

Simply state Tralee Coder Dojo as reference or the name of the participant.
